PROFESSIONAL
SECTOR

Areas of Main Interest Degree in Architecture from the Polytechnic of Turin with compositional and structural thesis entitled "Alternative proposal to Prerichard viaduct (Bardonecchia) Project.

.In 1986 he established contact with the studio of architecture Giovanni Bo of Asti where he developed specific expertise in the relief and relative graphic restoration of highly complex buildings of architectural significance by drafting the analysis, budgeting and accounting aspects with the help of specially designed software from 1994 onwards.; giving advice on the application of planning regulations, hygienic construction, fire prevention, the 13/89 law on the handicapped; supervision of work related to the restoration of buildings, both those listed by the historic buildings commission and new buildings. In the field of design it has achieved reclaiming of buildings in the historic center of Asti, residential buildings, furnishings for homes and places to eat. As a technical figure for bioedile ANAB-IBN AND CONSULTANTS, he created designs for wooden supporting structures and in some projects he directed and / or designed the structural works.

He has personally organised events for the Ayrton Senna Foundation in Imola, Rome, Paris, Turin, the latter of which in 2015 with Alessandro del Piero in the spaces ADP Log.

He has also created events for Dr. Costa of the Clinica Mobile, the world of Moto GP at Imola and Asti.

MAIN ROLES Designer
Project Manager
Planner
Bioedile Technician
Safety Coordinator during design and project management phases

PROFESSIONAL EXPERIENCE During the last three years of his Secondary school, he took part in a course organized by the G.A. Giobert Institute for Surveyors under the technical direction of the Commission for Architectural Heritage of Piedmont gaining specific experience in this area.

Technical maturity for Surveyors, achieved at the Technical Institute "I.T.C. G.A. Giobert" of Asti: 46/60 final vote.

In this period he began to collaborate with professional firms, in accordance with his education commitments. This collaboration continued throughout his degree course. These eight years of activity conducted in parallel to his courses of study have allowed him to acquire a sound technical and professional direct experience in the field of professional services and construction experience related to construction details, the technologies used and the relationships with individual workers.
